

Ramos, Sean Marion R.

21st CENTURY IT SKILLS – LAB 10

The original prompt:

Create a one-page resume with modern designs, and modern fonts, tailored for entry-level job applications. Extend descriptions, and refine them with professionalism.

The resume must be exported into a Microsoft word file.

Use the following details:

Name: John Name

Email: johnname@email.com

Phone: 0123-456-7890

Education:

Currently taking up BS-Computer Engineering

Skills:

Art

Video Editing

Programming using C#

Amateur Music Production

Projects/Experience:

Currently, my experience is oriented towards school work. More soon...

Define small margins. Most space will be taken up by the one-page resume.

The chatbots to be used:

- ChatGPT
- Google Gemini (Thinking mode will be used for this, because it tends to skip creating a Word file otherwise, opting to send instructions instead.)

ChatGPT's response:

John Name

johnname@email.com | 0123-456-7890

EDUCATION

Bachelor of Science in Computer Engineering (In Progress)

Currently pursuing a degree in Computer Engineering with a strong focus on foundational programming, systems design, and problem-solving. Actively developing technical and analytical skills through academic coursework and hands-on projects.

SKILLS

- **Art:** Creative visual design with attention to detail and aesthetics.
- **Video Editing:** Proficient in editing tools to produce engaging and polished multimedia content.
- **Programming (C#):** Basic to intermediate experience in developing applications and understanding object-oriented programming concepts.
- **Amateur Music Production:** Experience in composing and editing audio using digital tools.

PROJECTS & EXPERIENCE

Academic Projects:

Engaged in various school-based projects that involve programming, multimedia creation, and collaborative problem-solving. Demonstrated the ability to learn new tools quickly, meet deadlines, and present outputs effectively. Continuously expanding experience by exploring new technologies and personal projects.

Gemini's response:

JOHN NAME

johnname@email.com | 0123-456-7890 | LinkedIn.com/in/johnname

PROFESSIONAL PROFILE

Forward-thinking Computer Engineering student with a robust foundation in C# programming and a multifaceted background in digital media production. Expertly bridges the gap between technical logic and creative execution, offering skills in video post-production, digital art, and music composition. A proactive problem-solver dedicated to delivering high-quality, professional results in fast-paced environments.

EDUCATION

Bachelor of Science in Computer Engineering

University Name | Expected Graduation: 20XX

CORE COMPETENCIES

Programming: C#, .NET, OOP

Visual Arts: Video Editing, Digital Art

Software: Visual Studio, Git, Unity

Audio: DAW Proficiency, Sound Design

ACADEMIC EXPERIENCE & KEY PROJECTS

- Software Application Development (C#):** Architected and deployed a multi-functional desktop application using C#, focusing on efficient data management and user interface design. Applied Object-Oriented Programming (OOP) principles to ensure code scalability and maintainability throughout the development lifecycle.
- Digital Media & Video Production:** Directed and edited professional-grade video content for university initiatives. Integrated original digital art and custom audio tracks to create a cohesive narrative flow, significantly enhancing the quality of visual communication materials.
- Embedded Systems Interface:** Collaborated on the development of a hardware-software interface as part of the Computer Engineering curriculum. Responsible for writing logic-level software in C# to communicate with external sensors, demonstrating a strong grasp of technical integration.
- Audio Engineering & Music Production:** Composed and produced original soundscapes and audio cues for project presentations. Leveraged professional Digital Audio Workstations (DAWs) to mix and master audio, ensuring commercial-level clarity and impact.

	ChatGPT	Google Gemini
Completeness	Completes content. No modern design?	Enhances content, and adds additional tidbits of information. No modern design?
Formatting	Simple, leaning to the left	Leans to the left, adds some extra tabs
Professionalism	Maintains a professional tone. May be ready for publishing.	
Clarity and Conciseness	Explains and expands points, without erasing original meaning. Could use a bit more detail, though.	Adds specifications to different points where vagueness is visible. Highlights experiences that I haven't specified, which can be misleading.
Creativity	They're both visually boring, and uncannily similar?	

Above is a comparison between the outputs of the two LLMs. Without extra assistance (mostly), the outputs can be lackluster with the prompt that I'm using.

Final Thoughts

I'm perplexed about my thoughts towards the files that were generated.

On one hand, I had higher expectations for the generated outputs in regards to designs, but these outputs that were generated had lackluster designs. On the other hand, the content provided was well-expanded, to an extent. All I had to do at the end was modify content that seemed unnecessary.

It's hard to compare between the outputs of the two LLMs. The reason why that is the case is because the outputs are ***way too similar***. In that sense, ChatGPT and Google Gemini both did similar jobs. However, if I had to choose based on the quality and conciseness of the content, I would choose ChatGPT. The input by Gemini gave a lot of information from things I haven't experienced, so the conciseness by ChatGPT makes it a victor in my book.

All I really did to improve on what ChatGPT and Gemini provided is change the font, mix the inputs of the two, and change any slightly misleading information provided in Gemini's work. I appreciate wanting to be confident in my ability to learn, but I don't want to do work I am not ready for yet. Aside from those minimal corrections, the document is mostly the same.

Based on the prompts made by ChatGPT and Gemini, here is a slightly modified version of the resume:

Sean Marion Ramos
